

CP29 会员购抢票终极战术

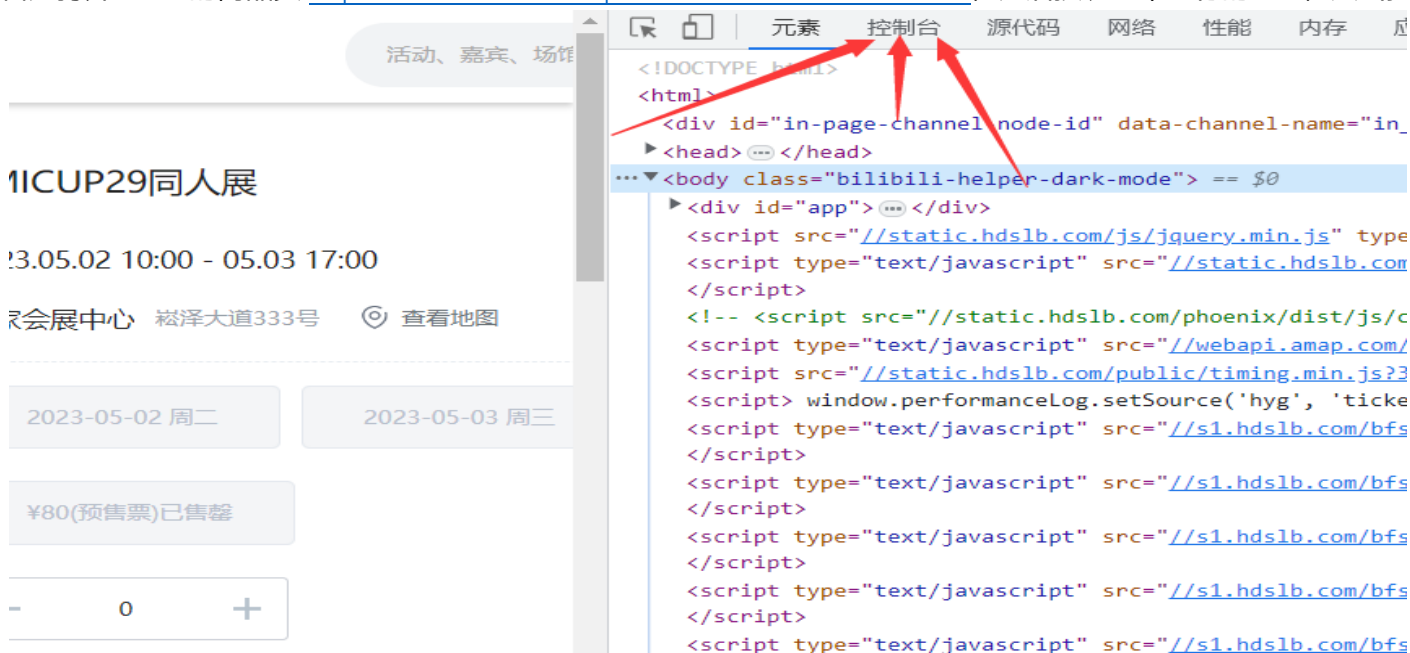

首先你要认清一点，现在**已经没票了**，你在做的是**蹲别人退的票**！Day1 看命，Day2 量大，坚持就有。

会员购的票仓将在今晚(4月30日24点即5.1日0点)关闭，**只剩下不到12小时**，现在是最后的冲锋阶段。

抢票需要一台**电脑**以及可靠的**浏览器**，Chrome 系浏览器基本都可以，还可以用**连点器辅助**，群友推荐的是这个

<http://www.shudaxia.com/>，我没用过，自己看好不好用吧。这只是个辅助

首先打开 CP29 的商品页 <https://show.bilibili.com/platform/detail.html?id=72320>，然后按键盘第一行的 F12，点击**控制台**

如果你要抢 DAY1 的票，复制以下代码

```
const response = await fetch("https://show.bilibili.com/api/ticket/order/prepare", {
  "headers": {
    "accept": "/*/*",
    "accept-language": "zh-CN,zh;q=0.9",
    "content-type": "application/x-www-form-urlencoded",
    "sec-ch-ua": "\"Chromium\";v=\"112\"", "\"Google Chrome\";v=\"112\"", "\"Not:A-Brand\";v=\"99\"",
    "sec-ch-ua-mobile": "?0",
    "sec-ch-ua-platform": "\"Windows\"",
    "sec-fetch-dest": "empty",
    "sec-fetch-mode": "cors",
    "sec-fetch-site": "same-origin"
  },
  "referrerPolicy": "strict-origin-when-cross-origin",
  "body": "order_type=1&count=1&project_id=72320&screen_id=126698&sku_id=380920&token=",
  "method": "POST",
  "mode": "cors",
  "credentials": "include"
});
const jsonData = await response.json();
console.log(jsonData.data.shield.naUrl);
console.log(jsonData.data.token);
```

如果 DAY2, 复制以下代码

```
const response = await fetch("https://show.bilibili.com/api/ticket/order/prepare", {
  "headers": {
    "accept": "*/*",
    "accept-language": "zh-CN,zh;q=0.9",
    "content-type": "application/x-www-form-urlencoded",
    "sec-ch-ua": "\"Chromium\";v=\"112\"", "\"Google Chrome\";v=\"112\"", "\"Not:A-Brand\";v=\"99\"",
    "sec-ch-ua-mobile": "?0",
    "sec-ch-ua-platform": "\"Windows\"",
    "sec-fetch-dest": "empty",
    "sec-fetch-mode": "cors",
    "sec-fetch-site": "same-origin"
  },
  "referrerPolicy": "strict-origin-when-cross-origin",
  "body": "order_type=1&count=1&project_id=72320&screen_id=126699&sku_id=380936&token=",
  "method": "POST",
  "mode": "cors",
  "credentials": "include"
});
const jsonData = await response.json();
console.log(jsonData.data.shield.naUrl);
console.log(jsonData.data.token);
```

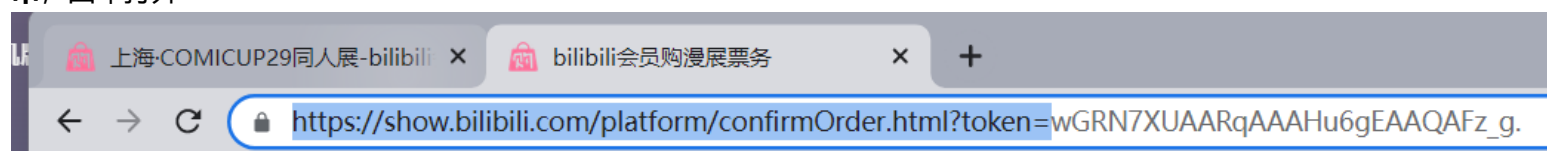

然后粘贴到控制台, 按回车

```
> const response = await fetch("https://show.bilibili.com/api/ticket/order/prepare", {
  "headers": {
    "accept": "*/*",
    "accept-language": "zh-CN,zh;q=0.9",
    "content-type": "application/x-www-form-urlencoded",
    "sec-ch-ua": "\"Chromium\";v=\"112\"", "\"Google Chrome\";v=\"112\"", "\"Not:A-Brand\";v=\"99\"",
    "sec-ch-ua-mobile": "?0",
    "sec-ch-ua-platform": "\"Windows\"",
    "sec-fetch-dest": "empty",
    "sec-fetch-mode": "cors",
    "sec-fetch-site": "same-origin"
  },
  "referrerPolicy": "strict-origin-when-cross-origin",
  "body": "order_type=1&count=1&project_id=72320&screen_id=126698&sku_id=380920&token=",
  "method": "POST",
  "mode": "cors",
  "credentials": "include"
});
const jsonData = await response.json();
console.log(jsonData.data.shield.naUrl);
console.log(jsonData.data.token);
```

wGRN7GAAARqAAAHu6gEAAQAFz_g. VM1813:20
VM1813:21

复制框里的这一串, 包括最后的英文点 ■

然后新的窗口地址框输入 [https://show.bilibili.com/platform/confirmOrder.html?token=](https://show.bilibili.com/platform/confirmOrder.html?token=wGRN7XUAAARqAAAHu6gEAAQAFz_g), 然后加上你刚刚复制到的那一串, 回车打开

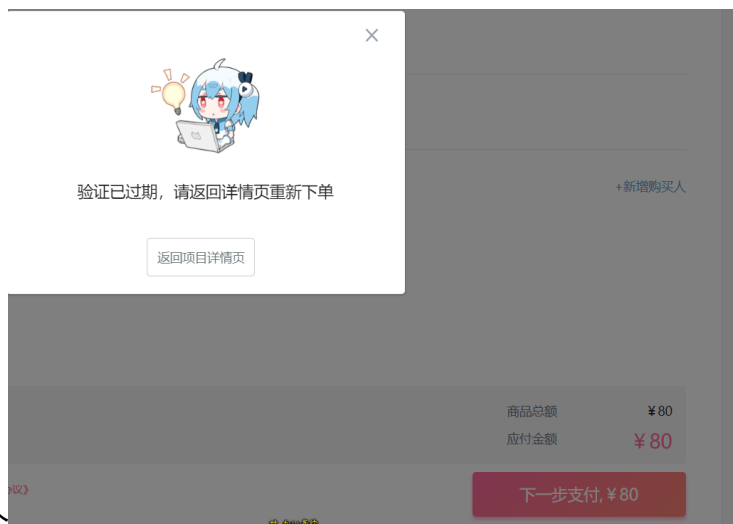

下一步支付, ¥80

然后就疯狂点

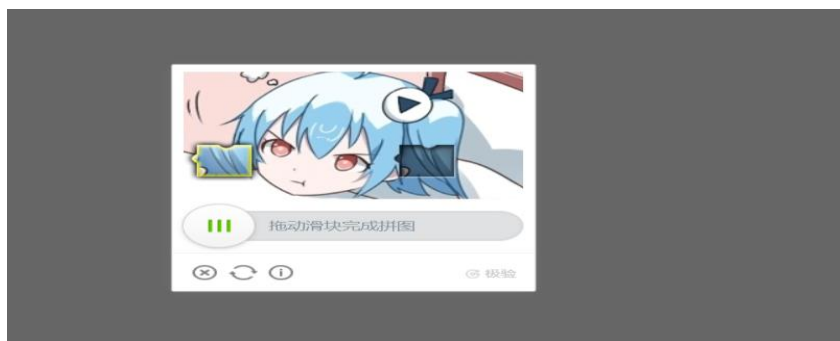

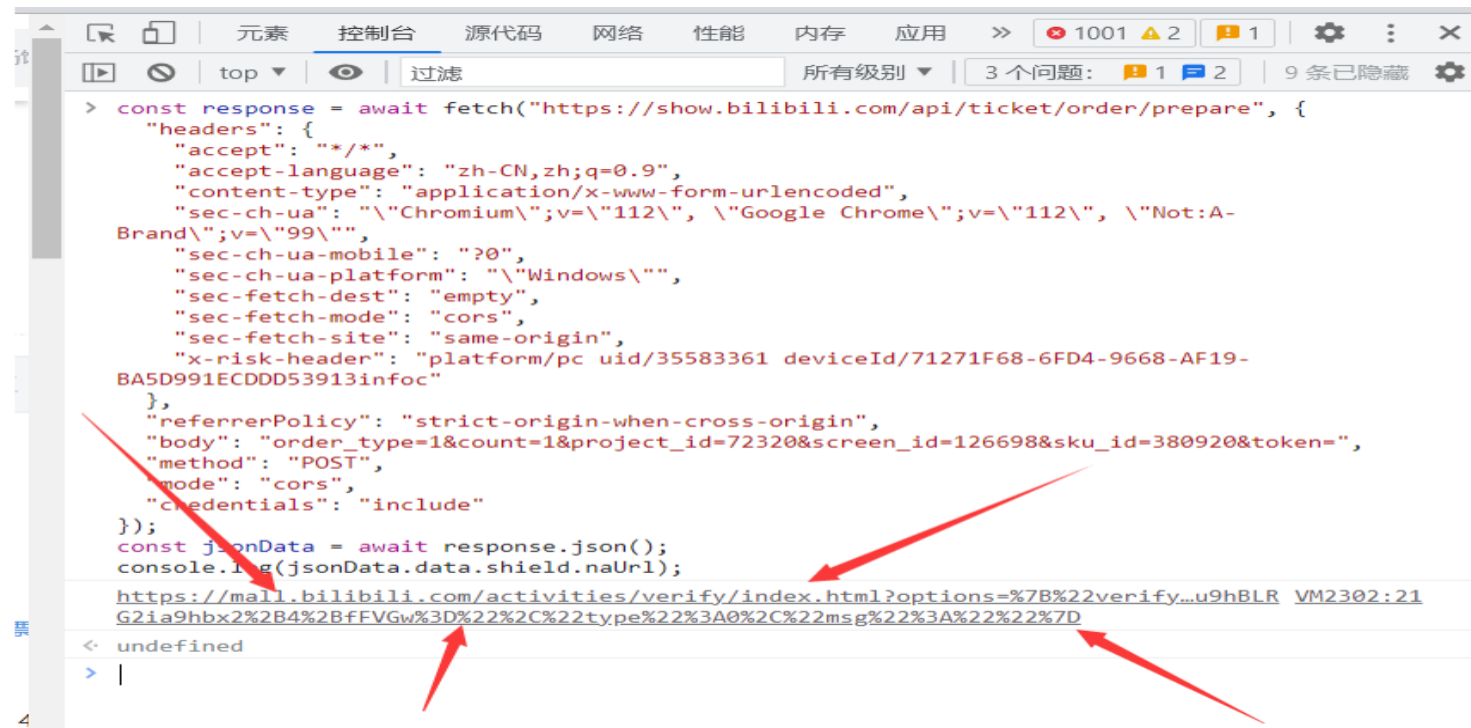

, 提示繁忙或没票都别管, 可以用连点器辅助, 1秒1次太快,

自行设置频率, 否则会被封半小时 ip!

如果出现这个

回到输代码那一步, 再运行一次, 这次你会看到一个链接

直接打开,

然后自己动手拉一下就行, 然后关掉这个

网页, 再次运行输代码那一步, 重新进入下单页点下单!

如果你点支付时一直闪小电视, 而且刷新了也没用, 那就是点的太快被封 ip 了! 要等大概 30 分钟, 或者你可以切换网络或用梯子, 总之这 20 分钟内得想办法换个 IP

如果出现这种啥都不显示的情况，提示已屏蔽，看下图

1、右键点击谷歌浏览器，选择属性

2、在目标输入框尾部加上 --disable-web-security

注意：这里 --disable-web-security 前面有一个空格
